Aulas: 16, 18, 23 e 25 de março: 11:00 às 13:00hs

Resumo:

The course will examine some fundamental aspects and concepts of Husserl's phenomenology and Freud's psychoanalysis. In particular, the relation between consciousness and the unconscious will be discussed, and here intentionality and association play a crucial role in mediating between the two disciplines. Two texts will be employed for the course: Husserl's *Cartesian Meditations* and Freud's *The Ratman*.
